SliceBox - Version 1.0

The SliceBox extension is based on Slicebox by Pedro Botelho:
http://tympanus.net/codrops/2011/09/05/slicebox-3d-image-slider/

SliceBox is a fresh 3D image slider.

Note: unfortunately, the slice effect does not work in any version of Internet Explorer. SliceBox will fallback to a standard fade effect on IE.

Description of properties:

Autoplay
If true the slicebox will start the animation automatically.

Cuboids Count
Number of slices / cuboids. Needs to be an odd number.

Cuboids Random
If true then the number of slices / cuboids is going to be random.

Fallback Fade Speed
The fallback will just fade out / fade in the items.

Images
Add, edit and remove images.

Interval
Time (ms) between each rotation, if autoplay is true.

Orientation
Specifies the orientation of the slice effect.

Perspective
Specifies the perspective value.

Sequential Factor
The animation will start from left to right. The left most cuboid will be the first one to rotate this is the interval between each rotation in ms.

Speed
Animation speed.

Arrow Background
Specifies the background color of the arrows.

Hidden Sides
Color of the hidden sides.

Description Text
Specifies the color of the text.

Description Background
Specifies the color of the background.

Dot
Specifies the color of the dots.

Dot Active
Specifies the color of the current dot.

Enable Shadow
Specifies whether to enable the drop shadow.

Font Family
Specifies the font family.

Font Size
Specifies the font size.

How to install this extension so it is available in WYSIWYG Web Builder?
You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
My Documents\WYSIWYG Web Builder\system\extensions\

Requirements
WYSIWYG Web Builder 11.1 or higher
