Silpaulin Poultry Curtains: Prepare Your Poultry Farm for Winter!

As the winter seasons coming, poultry farmers should take measures in the shed to ensure that their birds are protected against strong winds, changing temperatures, moisture, and high humidity. Management of the poultry farm in winter is necessary not only for the establishment of an ideal environment for the birds but also for smooth farm operations.

The ***Poultry Curtain*** would be a great choice for the open and curtain-sided poultry sheds. To avoid being exposed to such conditions directly, they can be put up along the walls of the poultry farm and opened according to the ventilation needs.

Why Silpaulin Poultry Curtains is very important in this winter seasons?

Silpaulin Poultry Farms Curtains are sheets of plastics used in chicken sheds and poultry farms. They mainly hang on the sides of the poultry house and can be regulated according to the climate conditions.

In the winter season, the ***chicken house curtains*** would act as a barrier against cold wind penetration into the poultry farm. In case of hot weather conditions, farmers could regulate the curtains to ensure improved air circulation.

Thus, the curtains have many uses in controlling different conditions in the poultry farm.

Benefits of Silpaulin Poultry Curtains for Poultry Shed Protection:

- Helps minimize exposure to cold winds
- Offers added weather protection
- Adjustable opening and closing
- Ideal for chicken shed walls
- Effective for weather control purposes
- Aids in controlling draft problems
- Good for use in open chicken sheds
- Simple to adjust depending on the weather

- Helps in the overall management of the chicken shed

Applications of Silpaulin Chicken House Curtains:

The curtains manufactured by "**The Supreme Industries Limited**" The No-1, plastic company in India, can be utilized in many different poultry farm structures such as:

1. **Broiler Poultry Farms**

Curtains in broiler houses are usually designed for the regulation of the openings in the sidewalls. Curtains can enable farmers to cope with changing weather conditions during production.

2. **Layer Poultry Farms**

Layer farms can also have side curtains depending on their shed design.

3. **Chick Brooding House**

The young birds might require additional protection against cold weather. The curtains can offer protection from the draft.

4. **Open Sided Poultry Sheds**

Open sided poultry sheds can make use of curtains for creating a flexible barrier from the weather.

5. **Year Round Seasonal Protection of Poultry Farm**

Since curtains are retractable and removable, they can be useful not only in winter, but also during windy and rainy weather all year round.

Features of the Plastic Curtains:

- 100% Virgin Polymer
- 100% Waterproof
- Multi-layered & Cross Laminated
- Light-weight, yet tough
- UV Stabilized
- Strong & Durable
- Stronger Joints
- Low Maintenance
- Improved Strength & Lasting Usage

Specifications:

- Manufactured by "***The Supreme Industries Limited***", the No1 plastic company in India
- As per BIS 14611:2016 standards
- Available in 70, 90, 120, 150, 200, 250, 300 GSM
